

Bana Electric Corp. encourages residents to keep their homes safe

In an effort to let the community know: “It’s Fire Prevention Month. Protect Your Family and Home Investment from Fire,” Bana Electric Corp. is teaming up with the National Fire Protection Association (NFPA), during the month of October.

This year’s campaign focuses on preventing the leading causes of home fires — cooking, heating and electrical equipment, as well as candles and smoking materials. Additionally, it urges people to protect their homes and families with life-saving technology and planning.

“In 2009, 2,565 people died in home fires,” says Shari Bender of Bana Electric Corp.

“Nearly all of these deaths could have been prevented by taking a few simple precautions like having working smoke alarms, a home fire escape plan and always turning off space heaters before going to bed. Fire is a dangerous opponent, but by anticipating the hazards, you are much less likely to be one of the nearly 13,000 people injured in home fires each year.”

Bana Electric Corp. offers a service that can keep you on the offense when it

comes to your home’s electrical system. A CurrentSAFE test on your home’s electrical system will identify the hidden hazards that could be devastating if left alone.

“Preventing home fires in Nassau and Suffolk counties is our number one priority,” Bender continued. “And Long Island residents need to take advantage of the CurrentSAFE test today in order to ensure their family’s safety.”

Bana Electric Corp. will be hosting activities during the month of October to promote “It’s Fire Prevention Month. Protect Your Family and Home Investment from Fire!” Through these educational, family-oriented activities, residents can learn more about the power of prevention and available technologies to protect their own families from fire.

Additionally, to help clients learn how keep their home and family safe from a devastating fire, Bana Electric Corp. offers free in-home assessments to see if the CurrentSAFE testing service is right for you and your family.
