**Water your plants
but not your outlets**

* Use GFCI outlets in kitchens and bathrooms and anywhere that water is present.

SPRING CLEANING?

Let us help you clean up your electrical mess!

It's inevitable. That winter mess. Clothes strewn about in the closet. Papers piling up on the desks. Boxes shoved into the garage.

It's springtime again and that means Spring Cleaning. Clean out those closets. Put away those papers. Recycle those boxes.

That's the easy part.

What about those wires being held together by electrical tape?

The overloaded power strip in the home office?

The spark you see every time you plug in that hairdryer?

The dimming lights when you least expect it?

Spring is the perfect time to give your house an electrical 'cleaning'. A CurrentSAFE inspection identifies all areas of electrical messes and hazards. Our complete report gives you the information you need to clean up your home's electrical system and make it safe from electrical fire hazards.

Don't delay, call today!

WE CAN HELP KEEP YOUR FAMILY SAFE

There is a residential electrical fire every 8 minutes in the United States.

There is something you can do to help keep your family safe.

We offer \$99 in-home assessments of your electrical system.
